

BASE Technology Partners

— BEYOND ALL SPOUSES EMPLOYED —

"The wives and husbands of our United States active duty military fill a critical role in the defense of our nation. Our goal is to provide great careers in technology for military spouses while helping companies effectively leverage their technology investments."

GEORGE BEDAR
Chief Information Officer

Our Purpose: Create unique technology career opportunities for spouses of active duty members of the U.S. military.

Our Mission: Deliver remote technology services to customers by expertly trained technology professionals.

Our Challenge & Opportunity

Numerous organizations train and employ military spouses and veterans – these programs are very fragmented, not well coordinated, and only focus on general training and job search assistance. This does not solve the root problem – family transfers to new locations force job change. Most military spouses are women and there is a notable shortage of women in STEM careers. STEM careers are a natural fit for dynamic situations, for working remotely, and offers sustainable careers paths for military spouses.

Our Vision

Our military spouse employment model enables significant opportunity to retain and attract military families by providing greater opportunities for uninterrupted employment throughout an extended military career. Establish collaborative and mutually beneficial partnerships with best-in-class technology companies:

- Focus on training and promoting careers in technology (STEM) for women and minorities to contribute and support military spouses.
- Align with entities whose specialty is career coaching, consulting, and flourishing in your career.
- Build a unique ecosystem by partnering with DoD organizations tasked with providing meaningful ways to support military families.

About BASE Technology Partners

BASE Technology Partners is a **for-profit** company.
